Change in Specifications

Under Part III., Scope of Work, page 16, the following sentence is deleted:

"All activities must be performed by a South Carolina-licensed well driller in accordance with R.61-71."

The following sentences replace the above:

"The work required under the solicitation can be performed by any qualified bidder. Additionally, a Class I or Class II UST Site Rehabilitation Contractor is not a requirement for this scope of work."

Question and Answer

1. Section III - Scope of Work (p. 16) states "All activities must be performed by a South Carolina licensed well driller in accordance with R.61-71."

A. Please see Change in Specifications above.

2. Is there a provision for disposal of contaminated soil removed during the UST removal? The [IFB] indicates no contaminated soil is to be returned to the excavation but there is not a line item for contaminated soil disposal.

A. The cost of the soil disposal should be accounted for in item 4, Clean & Remove USTs, collect soil/water samples for each facility. This lump sum cost should account for all costs (labor, equipment, supplies, etc) required to clean and remove the USTs from the ground. This would include excavation of the soil and disposal of the soil at an approved facility. The cost to collect the required soil and water samples from the excavation should also be included in this cost.
